DETAILED ACTION

Introduction

1. This office action is in response to applicant's amendment filed 9/8/09. Claims 1-4, 5, 8-10, 24 and 27-31 are currently pending and have been examined.

Response to Arguments

2. Applicant's arguments, see remarks, filed 9/8/09, with respect to the rejection of Claims 1, 4-5, 8-10, 24 and 27-31 Under 35 U.S.C. §112, the rejection of Claims 1, 4-5, 9-10, 24, 27-28 and 30-31 Under 35 U.S.C. §103(a), and the rejection of Claims 8 and 29 Under 35 U.S.C. §103(a) have been fully considered and are persuasive. The above rejections of the respective claims have been withdrawn.

Allowable Subject Matter

3. Claims 1-4, 5, 8-10, 24 and 27-31 are allowed.

The following is an examiner's statement of reasons for allowance:

The instant application is deemed to be directed to a non-obvious improvement over the invention patented in Epstein et al. (U.S. Patent No. 6,327,343) ("Epstein et al.") in view of Kanevsky et al. (U.S. Patent No. 6,219,407) ("Kanevsky et al.") and further in view of Sundberg et al. (U.S.

Patent No. 5,960,392) ("Sundberg et al."). Epstein teaches a method for indexing voice mail messages, including receiving messages, determining the identity of the callers by comparing speech signals. Kanevsky teaches creating new voice mail folders for an unknown caller. Sundberg and Murveit teach modifying a speaker model with a known identity based on speech signals. However, neither Epstein, Kanevsky, Sundberg, or Murveit, alone or in combination teach:

Regarding claim 1 "receiving an indicated **identity of the caller** from a voice mail subscriber, if the received identity matches a known identity, modifying a speaker model associated with the known identity based on **speech signals in the voicemail message associated with the received indicated identity.**

Regarding claim 8, receiving an indicated **identity of the caller** from a voice mail subscriber, wherein if the voice mail message is tagged as unknown, and if the received indicated identity matches a previously created speaker model, receiving further comprises **adapting the previously created speaker model based on speech signals in the voice mail message associated with the speaker.**

Regarding claim 24, receiving an **indicated identity of the speaker from a voice mail subscriber** and creating a new storage folder for voice mail messages from the speaker corresponding to **the received indicated identity**; and means for **adapting a previously created speaker model associated with the speaker based on speech signals in the voice mail message associated with the speaker**.

4. Claims 4, 5, 9, 10, and 27-31 are allowed as their respective independent parent claims have been deemed allowable.
5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
 - Lewis et al. (US 6,775,651) teaches voice mail system enrolling an unidentified caller.
 - Morganstein et al. (US 6,445,775) teaches identifying an unidentified caller.

- Tritschler et al. (US 6,424,946) teaches unknown speaker identification.
